EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Douglas L. Weller on January 4, 2005.

The application has been amended as follows:

IN THE CLAIMS:

Claim 10:

- Line 9, after "signals" added --by a first amount--.

Claim 44:

- Line 10, after "signals" added --by a first amount--.

2. The following is an examiner's statement of reasons for allowance: claims 1, 10, 16, 27, 36, 37 and 44 are patentable over the prior art patents and printed publications because of the specific method for determining a turn-on energy of a printhead, which consists of firing the printhead at a first frequency over an initial range of print energies to detect an approximate range of print energies in which the turn-on energy is located followed by firing the printhead at a second firing frequency over the detected approximate range of print energies in which the turn-on energy is located in order to

determine a value for the turn-on energy of the printhead, wherein the second firing frequency is higher than the first firing frequency. The combined limitations are not taught by the prior art of record alone or in combination.

Claims 2-9, 11-15, 17-26, 28-35, 38-43 and 45-49 are allowed because they are directly or indirectly dependent from claims 1, 10, 16, 27, 36, 37 and 44 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
